Technical Portfolio

SUMMARY

Technology Support Specialist with 7+ years of experience diagnosing computer, device, network, authentication, software, and account-related issues in high-volume technical environments. Skilled in hardware and software troubleshooting, log analysis, root-cause investigation, issue reproduction, and technical escalation. Experienced in supporting end users, clearly explaining technical solutions, and collaborating with engineering and operations teams to resolve complex system issues. Currently pursuing the CompTIA A+ certification to further strengthen expertise in hardware, operating systems, networking, and IT support.

PROFESSIONAL EXPERIENCE

Independent Technical Systems Analyst

March 2023 – Present

- Designed AI-assisted workflows to improve systems analysis, troubleshooting, & technical decision-making.
- Developed JavaScript tools to improve debugging and workflow efficiency.
- Tested AI-generated outputs for technical accuracy and reliability.
- Researched Web3 authentication and wallet integration workflows.
- Evaluated AI tools to improve technical support workflows and process efficiency.

Website Coordinator

River Street Sweets | Sep 2022-Feb 2023

- Supported website operations by troubleshooting authentication, CMS, and checkout issues.
- Identified user experience issues using behavioral and system data.
- Collaborated with technical teams to improve website performance.
- Performed quality assurance (QA) testing for website content, pricing, inventory, and CMS updates.

Customer Advocacy Advisor

Apple Inc. | Sep 2020-Mar 2021

- Analyzed support trends to identify recurring application and system defects.
- Investigated authentication and service reliability issues.
- Collaborated with engineering and cross-functional teams to resolve recurring application issues.
- Documented findings and recommended process improvements.

Senior Technical Advisor

Apple Inc. | Apr 2014-Sep 2020

- Performed systems analysis and troubleshooting for authentication, software, hardware, and network issues.
- Provided application support for authentication, operating system, and software issues.
- Reproduced software defects and documented findings for engineering teams.
- Resolved authentication, operating system, and application issues through systematic troubleshooting and root cause analysis.
- Collaborated with engineering teams to resolve complex technical incidents.
- Documented troubleshooting procedures & technical findings to improve issue resolution & knowledge sharing.

CORE TECHNICAL COMPETENCIES

- | | | |
|-------------------------------------|-----------------------------------|----------------------------------|
| • Software & Application Support | • Technical Diagnostics | • Technical Documentation |
| • Device & System Troubleshooting | • Log Analysis (iLog) | • Customer Service |
| • Network Troubleshooting | • Root-Cause Analysis | • User Training & Mentoring |
| • Authentication & Account Access | • End-User Technical Support | • Information Security Awareness |
| • Operating System Support | • Remote Technical Support | • HTML & CSS |
| • Computer Hardware Troubleshooting | • Issue Reproduction & Escalation | • JavaScript |
